POOP ON PARTIES. They say don't fix what ain't broke, and the original beat hazard had a winning formula. This sequel retains all the fast paced action you know and love while modernizing it for the streaming era of music!

The track detection works very well, only failing when i hit the real obscure stuff on Bandcamp, and the leaderboards are already in place! If you plan on using open mic mode for music streaming, I recommend you use a Line In port if you have one to remove potential background noise from interfering with enemy generation and weapons.

Having integrated streaming from popular services like spotify would improve the experience, but even if that doesn't happen, I'm very impressed with what we already have and look forward to future updates!. Do not buy this, there is no more multiplayer support for MoW AS since it was powered by gamespy. I don't understand why they keep this on their store page, shouldn't even be an option to buy this.... Any reason that nothing works?. Very spheric and nice tracks, although i dislike electronical music, i must say, this is a well sounding OST.. The issue with the games dlc is that it wants to run through 'Games for Windows Live' to activate, and I've noticed that a couple people have been unable to use their dlc as a result. If you tried to log in, GfWL would hang and your game would freeze.

It was by chance that I was able to solve my problem by doing the following:

- 1) When GfWL activates I selected 'log into existing account'
- 2) There would then be an option to 'create local account' located in the main body of text. This would bypass logging into the GfWL service.
- 3) You are then prompted to type in a user name (any will do)
- 3) The game will then go through the process of activating your dlc, and should then work accordingly.

If you had troubles registering your dlc and this process worked for you please give it a thumbs up for visibility to help others.

Hard to know how your tactics are working, why you're winning or losing due to the lack of a game-engine where you could actually follow the game. At least more info on the games played would be needed.
